

their safety is essential.

Products made to work hard—and built to last.

Protect from Fire with Justrite

Improper storage and handling of flammable and corrosive liquids is the leading cause of industrial fires. An average of 37,000 fires in manufacturing and industrial properties are reported each year.

Proper handling, storage, and disposal can help eliminate millions of dollars of damage. Justrite offers compliant safety cans, containers, and safety cabinets to help save the lives of your employees.

HPLC Waste Disposal Safety Can

- The only FM approved safety can for collecting and disposing of flammable liquids waste from the HPLC process.
- Quick-disconnect system permits “hands-free” waste accumulation in a closed container.
- Use with an EPA approved spill basin.

Sure-Grip EX® Flammable Safety Cabinet

- Constructed to OSHA and NFPA requirements for storage of flammable and combustible liquids.
- Safety cabinets keep the stored materials from reaching their auto ignition temperature, allowing time to evacuate the area.
- High-visibility labels help first responders identify hazards during fire.

Metallic Acid Cabinet with ChemCor® Liner

- Give your staff maximum protection from harsh acids and corrosive chemicals.
- ChemCor® thermoplastic coating on all interior surfaces provides superior protection against corrosion from drips and off-gassing from harsh chemicals.
- Non-porous surface resists staining and cleans up easily.
